V-CARD to QR Generator

Website

Ex-Fullstack Developer, V-CARD to QR Generator is a website to generate an excel file that contains employee information and a QR Code which contains V-CARD so the employee contact data could easily be shared and collected. Developed using NodeJS Express, Embedded Javascript and MySQL.

Polytron Employee Self Service

Website

Ex-Backend Developer and Database Administrator, Polytron's Employee Self Service is a website used by all Polytron employees to request change or fix about their education, biodata, family information, address and emergency contact. It is divided into 2 parts: the user (employees) part and the admin panel managed by the human resource department who approves/rejects the user's document request changes. Developed the admin panel side using NodeJS Express, Redis, Embedded Javascript, and MySQL.
